

Quinten De Meyer

Projects

1. IT Polis Voting System (SKIL2 Project)

Created database architecture and implemented real-time data processing for a voting system. Learned secure database design and NFC technology integration.

2. App Hosting Platform for Clients (SKIL2.2 Project)

Managed Kubernetes cluster for PHP/Laravel applications. Learned containerization, high availability deployment, and implemented CIS security controls.

3. Security Awareness Campaign Movie (Media Project)

Served as main editor and creative director for cybersecurity awareness film. Developed skills in visual storytelling and communicating complex security concepts.

4. KeyedColors (Personal Project)

Developed Windows application for custom display profiles with hotkey support. Gained experience with Windows API, system tray integration, and UI/UX design.
